

# Get back to work safely.

Our cleaning regimen will ensure your office is free of COVID-19 and ready for a full, safe work environment.

All areas are thoroughly sprayed and wiped with **Sporicidal Grade Disinfectant** that kills COVID-19 and many other viruses on contact and surfaces are sterilized with a **UVC Surface Sterilizer**.

Our cleaning products derive from an **advanced 100% safe chemical formula**. We use the **latest innovative tech** to monitor and verify the entire cleaning process, including **ATP Cleaning Verification**, which tests and tracks how clean a surface is.

**Serious threats to public health and our nation's economy require serious solutions.**

- Every year, close to 100k people die from Surface Acquired Infections
- Workplace illness costs \$200+ billion/year in lost productivity
- One norovirus outbreak cost a major university \$30,000 per day / \$400,000 a week
- Foodborne Salmonella, e Coli, and Listeria outbreaks happen every week and result in costly recalls

Handheld UVC Surface Sterilizer

Advanced Cleaning Verification and Monitoring System

Electrostatic Backpack Sprayer

The cleaning products we use have been used by many hospitals, schools, and companies, including Delta, to get back to work after the COVID-19 outbreak.

# COVID-19 & REOPENING: **YOUR BACK TO WORK CHECKLIST**

We're in this together. As New York starts to reopen, it's time for some business owners, facility managers and HR departments to begin planning for reopening. That's why using the CDC's official guidelines, CleanClean has created this checklist to help you develop, implement, and maintain a reopening plan, so your customers and employees can safely enter.

## Step 1: **DEVELOP A PLAN**

To begin, you need to determine what types of surfaces, materials, and objects your facility consists of.

- Determine what needs to be cleaned
- Determine what needs to be disinfected
- Determine the resources and equipment you will need

## Step 2: **IMPLEMENT YOUR PLAN**

Read the instructions for any cleaning and disinfecting products you use and put on appropriate gloves before getting started.

- Clean all visibly dirty surfaces and objects using soap and water
- Be sure to follow the instructions provided on the product label
- Use the appropriate cleaning or disinfectant product for your needs

## Step 3: **MAINTAIN AND REVISE YOUR PLAN AS NEEDED**

Continue to follow this plan and make revisions based on updated guidance.

- Continue cleaning and disinfecting on a regular basis
- Maintain safe behavioral practices
- Consider practices that reduce exposure potential

**CLEANCLEAN**  
CLEAN YOUR SPACE AWAY

With many people under one roof, it can be difficult to maintain a clean and sanitary workplace without help. Let us help you keep your office, industrial facility or other commercial property clean and germ-free. Get in touch with us today.
